LIST OF CONTENTS

NUMBER 1

M. M. Saadatpour and **M Azhari**	1	The Galerkin method for static analysis of simply supported plates of general shape
L. Briseghella, C.E. Majorana and **C. Pellegrino**	11	Dynamic stability of elastic structures: a finite element approach
M. C. Bruno, V. Di Capua and **C. Franciosi**	27	Refined semianalytical solutions in the approximations of higher eigenvalues
E. A. Sadek	37	Some serendipity finite elements for the analysis of laminated plates
G. Manfredi and **M. Pecce**	53	A refined R.C. beam element including bond–slip relationship for the analysis of continuous beams
X. Cao, Y. Sugiyama and **Y. Mitsui**	63	Application of artificial neural networks to load identification
K. G. Woodgate	79	Efficient stiffness matrix estimation for elastic structures
J. Friedrich	85	Object-oriented model and code for the visual examination of subsurface structures under historical buildings
Chen Nan, H.-R. Meyer-Piening and **C. Decking**	95	Dynamic behaviour of cable supporting roller batteries: basic model
W. Glabisz	105	Global analysis of discrete nonconservative nonlinear systems with dynamic follower parameters
M. Brünig	117	Nonlinear finite element analysis based on a large strain deformation theory of plasticity
P. Wriggers and **A. Boersma**	129	A parallel algebraic multigrid solver for problems in solid mechanics discretisized by finite elements

NUMBER 2

Y. Lu and **P. J. Wright**	139	Numerical approach of visco-elastoplastic analysis for asphalt mixtures
E. Sai Baba Reddy, M. O'Reilly and **D. N. Chapman**	149	A computer package for the design of piles under cyclic tensile load
A. Tesar	159	Ultimate dynamics of corrugated shells

M. S. Williams, R. S. G. Thompson and **G. T. Houlsby**	171	Non-linear dynamic analysis of offshore jack-up units
M. Ganapathi and **V. Balamurugan**	181	Dynamic instability analysis of a laminated composite circular cylindrical shell
C. Franciosi and **M. Mecca**	191	Some finite elements for the static analysis of beams with varying cross section
J. R. Banerjee	197	Free vibration of axially loaded composite Timoshenko beams using the dynamic stiffness matrix method
D. L. Kunz	209	An object-oriented approach to multibody systems analysis
E. Bittencourt and **G. J. Creus**	219	Finite element analysis of three-dimensional contact and impact in large deformation problems
D. Huang and **T.-L. Wang**	235	Vibration of highway steel bridges with longitudinal grades
M. A. Sales and **L. J. Gray**	247	Evaluation of the anisotropic Green's function and its derivatives
R. Y. Liang and **J. X. Zhu**	255	Efficient computational algorithms for forward and backward analysis of a dynamic pavement system
R. M. V. Pidaparti and **C. C. Chang**	265	Finite element supersonic flutter analysis of skewed and cracked composite panels
Y.-S. Lee and **Y.-W. Kim**	271	Vibration analysis of rotating composite cylindrical shells with orthogonal stiffeners
M. C. Ray	283	Closed-form solution for optimal control of laminated plate

NUMBER 3

S. Di and **H. Rothert**	291	Solution of a laminated cylindrical shell using an unconstrained third-order theory
M. Raoof and **I. Kraincanic**	305	Prediction of coupled axial/torsional stiffness coefficients of locked-coil ropes
M. D. Al-Ansary	321	Flexural vibrations of rotating beams considering rotary inertia
S. R. Ahmed, M. R. Khan, K. M. S. Islam and **Md W. Uddin**	329	Investigation of stresses at the fixed end of deep cantilever beams

B. Karlik, E. Özkaya, S. Aydin and M. Pakdemirli	339	Vibrations of a beam-mass systems using artificial neural networks
M. A. Mohiuddin, M. Bettayeb and Y. A. Khulief	349	Dynamic analysis and reduced order modelling of flexible rotor-bearing systems
O. S. Bursi and J. P. Jaspart	361	Basic issues in the finite element simulation of extended end plate connections
M. D. Kotsovos and K. V. Spiliopoulos	383	Modelling of crack closure for finite-element analysis of structural concrete
M. D. Rucki and G. R. Miller	399	An adaptable finite element modelling kernel
S. Chandrakanth and P. C. Pandey	411	Damage coupled elasto-plastic finite element analysis of a Timoshenko layered beam

NUMBER 4

H. B. Chen, P. Lu, M. G. Huang and F. W. Williams	421	An effective method for finding values on and near boundaries in the elastic BEM
M. P. Saka and E. S. Kameshki	433	Optimum design of unbraced rigid frames
M.Y. Rafiq and C. Southcombe	443	Genetic algorithms in optimal design and detailing of reinforced concrete biaxial columns supported by a declarative approach for capacity checking
S. Das and B. Patra	459	Stress intensity factors for moving interfacial crack between bonded dissimilar fixed orthotropic layers
E. Carrera and H. Krause	473	An investigation of non-linear dynamics of multi-layered plates accounting for $C \supset Q$ requirements
Y.-J. Li and Th. Zimmerman	487	Numerical evaluation of the rotating crack model
Y.F. Luo and J. G. Teng	499	Stability analysis of shells of revolution on nonlinear elastic foundations
M. H. Imam	513	Shape optimization of umbrella-shaped concrete shells subjected to self-weight as the dominant load
Z. Waszczyszyn and M. Janus-Michalska	525	Numerical approach to the 'exact' finite element analysis of in-plane finite displacements of framed structures
B. J. E. van Rens, W. A. M Brekelmans and F. P. T. Baaijens	537	Homogenization of the elastoplastic behavior of perforated plates

NUMBER 5

M. I. Friswell, J. E. T. Penny and S. D. Garvey	547	A combined genetic and eigensensitivity algorithm for the location of damage in structures
D. Martín and M. Aliabadi	557	A BE hyper-singular formulation for contact problems using non-conforming discretization
U. Galvanetto, C. Pellegrino and B. A. Schrefler	567	A three-dimensional stress recovery procedure for composite materials
C. K. Lee and R. E. Hobbs	577	Automatic adaptive finite element mesh generation over rational B-spline surfaces
G. Singh, K. K. Raju and G. V. Rao	609	A new lock-free, material finite element for flexure of moderately thick rectangular composite plates
S. Lopez, S. Fortino and R. Casciaro	625	An adaptive multigrid solver for plate vibration and buckling problems
A. Gawęcki, M. S. Kuczma and P. Krüger	639	Analysis of slackened skeletal structures by mathematical programming
C. E. Jouglard and A. L. G. A. Coutinho	655	A comparison of iterative multilevel finite element solvers

NUMBER 6

E. J. O'Brien and D. L. Keogh	671	Upstand finite element analysis of slab bridges
H. Singh, D. K. Paul and V. V. Sastry	685	Inelastic dynamic response of reinforced concrete infilled frames
J. W. Bull and C. H. Woodford	695	Camouflets and their effect on runway support
B. Hassani and E. Hinton	707	A review of homogenization and topology optimization: I—homogenization theory for media with periodic structure
B. Hassani and E. Hinton	719	A Review of homogenization and topology opimization: II—analytical and numerical solution of homogenization equations
B. Hassani and E. Hinton	739	A review of homogenization and topology optimization: III—topology optimization using optimality criteria
S. Chandra	757	Information extraction and qualitative descriptions from dynamic simulation data
Q. Shan and W. M. Zhai	767	A macroelement method for catenary mode analysis
W. X. Zhong, Y. K. Cheung and Y. Li	773	The precise finite strip method
